

Morning session with Mosaic: Reflect on the Saint Louis Zoo with Stock and Flow

Time	Activity	Steps	Point Person	Materials
8:30-8:35	Transition In and Do Now	1. Introduce myself a. "I'm a social work student at WashU, and I'll be leading the session this morning..." 2. Do-Now: Use one word to describe your experience at the zoo a. Take 3-5 answers b. Use the answers to transition into the next section	Xinyuan	
8:35-8:45	Introduce Stock and Flow	1. Briefly introduce the stock and flow model a. Start with the bath analogy: "Have we used a bath tub before?" b. "Bathtub has water in it." "To add water, you turn on the faucet, and water flows in." "How can we lower the water level?" "Yes, you drain it, that's water flowing out." c. Label components of the model: stock, inflow, and outflow d. "Stock can also be an abstract idea." 2. Prompt: What makes the zoo great? That is, what makes people want to go to the zoo a. Relabel the bathtub as "zoo greatness" b. "Today we define great as easy to go and fun." c. Give an example	Xinyuan	1. Whiteboard 2. Markers

		of how to add a variable to inflow & outflow d. Give an example of how to connect two variables -> think in thumbs e. For example, parking spots influence inflow, but when zoo becomes better, more people come, and there are fewer spots -> loop 3. Split students into groups and distribute poster boards		
8:45-8:55	Group Work	1. Walk around the room, clarify steps, and answer questions 2. Give time prompts	Xinyuan	1. Poster boards
8:55-9:00	Closing	1. Let each group briefly share their thoughts 2. Collect finished poster boards	Xinyuan	

Potential variables: perception of crowds, highway access, transportation, parking spot, variety of animals, seasonal exhibitions, free admission, etc.
